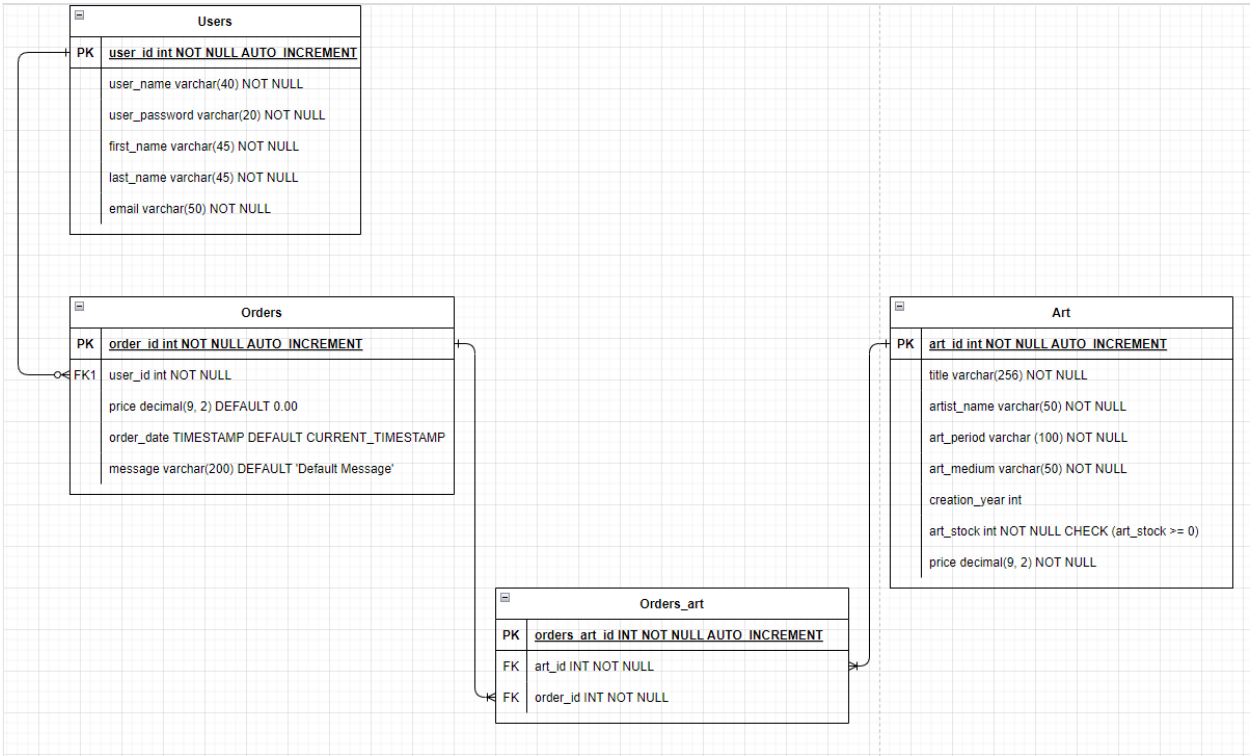
Entity Relationship Diagram for Project:



API Documentation(simplified):

Browse art (/**browse**):
GET
Requires input(s):
Expected outcome: List of all Art objects in database
HTTP Statuses:

- 200, A list of Art is returned
- 500, An unplanned error occurred

Browse art by title (/**title**):
GET
Requires input(s):

- title(String)

Expected outcome: List of all Art objects in database that include the supplied title.
HTTP Statuses:

- 200, A list of Art is returned
- 400, The request parameters are invalid
- 404, No art was found with the input criteria
- 500, An unplanned error occurred

Browse art by artist's name (/**artist**):
GET
Requires input(s):

- artist_name(String)

Expected outcome: List of all Art objects in database that include the supplied artist name.
HTTP Statuses :

- 200, A list of Art is returned
- 400, The request parameters are invalid
- 404, No art was found with the input criteria
- 500, An unplanned error occurred

Browse art by period (/**period**):
GET
Requires input(s):

- art_period(String)

Expected outcome: List of all Art objects in database that include the supplied period.

HTTP Statuses:

- 200, A list of Art is returned
- 400, The request parameters are invalid
- 404, No art was found with the input criteria
- 500, An unplanned error occurred

Get User Info (/**user**):
GET
Requires input(s):

- user_name(String)
- password(String)

Expected outcome: Returns a User object (first name, last name, email, etc.) that correlates with the supplied user_name and password inputs.
HTTP Statuses:

- 200, A User has supplied valid credentials and user's info is returned
- 401, The user's credentials are invalid
- 500, An unplanned error occurred

Create Order (/**order**):
POST
Requires input(s):

- art_id(int)
- user_id(int)

Expected outcome: Creates a new order with the supplied art_id and user_id. Returns the newly created order.
HTTP Statuses:

- 201, The created art order is returned
- 400, The request parameters are invalid
- 404, no art was found with the input criteria or the art may be out of stock
- 500, An unplanned error occurred.

Add To Order (/**addtoorder**):
POST
Requires input(s):

- art_id(int)
- user_id(int)
- order_id(int)

Expected outcome: Adds art with supplied art_id to an existing order with supplies order_id. Returns order with new art.

HTTP Statuses:

- 201, The updated art order is returned
- 400, The request parameters are invalid
- 404, no art was found with the input criteria or the art may be out of stock
- 500, An unplanned error occurred.

Change order message (/**message**):
PUT
Requires input(s):

- order_id(int)
- message(String)

Expected outcome: Updates existing order message with new supplied message. Returns updated order.
HTTP Statuses:

- 200, The order's message has been successfully updated
- 400, The request parameters are invalid
- 404, No order was found with the supplied order_id
- 500, An unplanned error occurred.

View art in order (/**vieworder**):
GET
Requires input(s):

- order_id(int)

Expected outcome: returns a list of art that contains supplied order_id.
HTTP Statuses:

- 200, A list of Art is returned
- 400, The request parameters are invalid
- 404, No art was found with the input criteria
- 500, An unplanned error occurred

Delete an order (/**delete**):
DELETE
Requires input(s):

- order_id(int)

Expected outcome: Deletes the order with supplied order_id. Returns the deleted order.
HTTP Statuses:

- 200, Order deleted successfully
- 404, Supplied order_id does not exist
- 500, An unplanned error occurred
